

# NEW PRODUCT!

**BRYCE**  
Fastener

# STYKFIT™7

Premium, high-torque fasteners

## We've combined security & productivity.

STYKFIT™7 drastically improves productivity. Never drop another screw. The driver bit and fastener "stick-fit". They fit tightly enough to support the weight of an assembly item eliminating the need for clamping. You've never had security this fast.

### 1. Secure/Tamper-proof

Unique 7-fin profile and center rejection pin.

### 2. Holds fasteners tightly enough to bear weight

Driver bit holds more than the fastener. Tapered driver bit indexes tightly enabling screw to bear the weight of the piece being assembled.

Provides an extra hand.

### 3. Fast assembly time

Fast indexing – even while driver bit is rotating; no fumbling, dropping, or re-attaching the fastener to the bit.

### 4. Non-magnetic

Hold fastener without need for magnetic driver bits or sliding sleeves (works with stainless and coated fasteners).

### 5. Extreme torque threshold

Higher torque allows for more security.

### 6. Brykote™ Protective Coating

Up to 700 hours of extra corrosion protection. Available in colors.

### 7. Guaranteed

More secure and faster assembly guaranteed - wait until you see how efficient you can be.

For a STYKFIT™7 sample or pricing, call us or visit online.

PATENTED IN US AND  
OTHER COUNTRIES

Patented 7-fin profile with tapered keyway  
and center rejection pin.

Fits tightly enough to hold weight, aids in assembly.

Currently available in:

- Self-drilling
- Concrete

410 hardened stainless  
and coated

Made in USA

Engineered and crafted 100% in the USA
