COIL THREAD SECURITY BOLTS

Great for pre-cast concrete.

STANDARD-SECURITY & HIGH-SECURITY DRIVES AVAILABLE IN COIL-THREADED BOLTS

Coil Thread Security Bolts work well in pre-cast concrete forms that contain the corresponding female coil insert. The concrete grit does not affect coil threads, plus they're removable and reusable. Coil Thread Security Bolts are normally used in vaults to secure copper and telecommunications.

We carry stock in low-risk **1/2 - 6 Penta Head Standard-Security Coil Bolts** up to 3" (\$100.00 minimum). We recommend using Penta Head Coil Bolts for low-value items. Locking pliers can remove the bolts.

Special orders are available in our **High-Security Head Styles**, where only the matching tool can remove the coil bolts. We recommend using Key-Rex®, Penta-Plus™, or STYKFIT®7 for securing high-value items. Our lengths can go up to 5½."

BryKote™ is recommended.

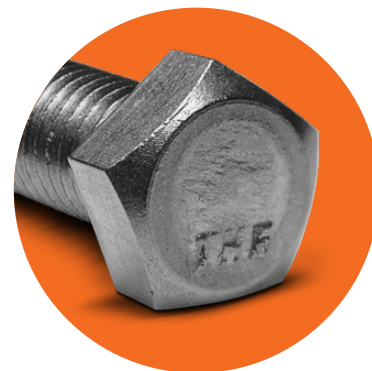

- ▶ 1/2-6 x 2 ½ Penta Head Standard-Security Coil Bolt.

Sizes Available:

- 1/2-6 x 1 ½
- 1/2-6 x 2
- 1/2-6 x 2 ½
- 1/2-6 x 3

- ▶ **Key-Rex® Coil Security Bolt** protecting a concrete enclosure from copper wire theft.

- ▶ We carry some stock in low-risk **1/2 - 6 Penta Head Standard-Security Coil Bolts**, up to 3" (\$100 min.). Call or Email for stock.
