

**A BRYCE
EXCLUSIVE**

SECURITY SET SCREWS

Security Set Screws
"Headless" Security Screws
"Grub" Security Screws.

STANDARD-SECURITY & HIGH-SECURITY OPTIONS

We offer Flat Point Security Set Screws in all five of our Security Drive Styles.

Sizes range from 8/32 (M4) – 5/8-11 (M16). The length on our set screws must be longer than the diameter to permit threading on our machines.

DRIVE OPTIONS

Key-Rex[®], STYKFIT[®]7, and Tam 6-Lobe[™] are special order with 2,500 minimum quantities.

Penta-Plus[™] and Hex-Pin Security Set Screws are our two most ordered drive styles.
Call/Email for stock.

IS YOUR APPLICATION WORTH OVER \$100.00?

If you answered no, then Hex-Pin and Tam 6-Lobe[™] Security Set Screws are the right drives to choose. Skateboard "Stoppers" are an example where lower level (Hex-Pin and Tam 6-Lobe[™]) Security Set Screws are needed.

If you answered yes, we recommend going with Penta-Plus[™], Key-Rex[®], or our STYKFIT[®]7 Security Set Screws, where the security bits are either exclusive-to-you or regulated by Bryce Fastener. Military weaponry cases and retail product displays are applications worthy of higher-level-security set screw protection.
