

# Special Applications

Not All Security Needs Can Be Met by Standard-Security Fasteners.

## WE ARE THE MANUFACTURER

Based on our manufacturing capacity and creative talent, Bryce Fastener's expertise is to help find you the best security fastener solution. We have solutions when you need something too big, too long, too short, too small, or too few. Below are some examples of past non-standard solutions. Please call with your application and needed quantity. Chances are we can find a solution at a reasonable price.

### Special Applications Include:

*(Clockwise from top left)*

- A tether screw for library notebook computers
- A 7/8 x 3 bolt and nut out of 316 Stainless Steel for NOAA buoys
- A bolt to secure copper in vaults with an added sleeve that spins
- Should bolt to secure ECM (*electronic control module*) components in trucks
